

CADET, ESTATE & SWIFT
12-volt & hand operated sprayers

CADET 300

The 300 litre heavy duty single axle CADET sprayer with leaf spring suspension and high flotation tyres is ideal for farmers, estate owners, turf care professionals and industrial turf caretakers.

CADET 300 is an excellent alternative to small three point linkage sprayers where capacity is required but towing is the preferred option.

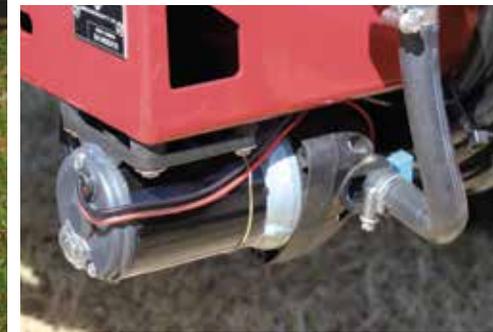

A standard 50 mm trailer coupling draw bar provides a secure and easy connection to ATV's, UTV's and small tractors.

CADET covers the ground fast and efficiently with a choice of 3, 4m ATV or 6m SB boom.

For spot spraying a 60S spray gun with 6m of hose, on a hose holder is standard with 20m hose reel optional.

Features:

- Heavy duty chassis
- 300L integrated polyethylene tank
- Smooth ride leaf spring suspension
- Low pressure, high flotation 22 x 11.0 tyres
- Mud guards
- External suction filter
- Flojet diaphragm pump
- Pressure regulation, gauge
- 3-way boom distribution
- Choice of 3 to 6m booms
- Optional 60S handgun with 6m hose
- Optional 20m hose reel, hose &

Suspension *left*

Leaf spring suspension reduces shock transfer to the tank and chassis and provides a smooth ride for the boom for improved spraying performance.

Fluid Control *right*

Pressure regulation, gauge and 3-way boom distribution. A removable 4L hand wash tank with ball valve tap is provided.

CADET 300 litre sprayer, 3521-500 pump, 15.1 l/pm at 4.1Bar

ATV/UTV 400L Tandem Axle

HARDI ATV/UTV sprayer with 400L tank, heavy duty tandem axle chassis and high flotation tyres offers serious capacity for small farming operations.

An excellent alternative to small three point linkage sprayers, where capacity is required but towing is preferred.

A standard 50 mm trailer coupling provides easy connection to utility vehicles and the draw bar includes a smooth ride shock absorber to allow for independent movement between the trailer and the vehicle.

With a choice of 6 or 8m boom for the 400 ATV trailer, they can cover the ground fast and efficiently.

Great for spot spraying with 6 metres of hose and a 60S spray gun.

Features:

- Heavy duty chassis
- 400L integrated polyethylene tank
- Smooth ride tandem axle suspension
- Low pressure, high flotation 22 x 11.0 tyres
- External suction filter
- Flojet diaphragm pump
- Pressure regulation, gauge
- 3-way boom distribution
- Terrain following drawbar
- Choice of 6 or 8m booms
- 60S handgun with 6m hose
- Opt 20m hose reel, hose & 60S handgun

Fluid Control *left*

Pressure regulation, gauge and 3-way boom distribution.

FLOJET diaphragm pump *right*

Flow rate to 16.1/min at 4.1 bar (60 psi)

PLUS Convenient 60S spray gun stowage, Adjustable boom height.

8m SB boom	5911685

ESTATE Turf 120

The ESTATE Turf is ideally suited to ride-on lawn mowers and makes spraying weeds in lawn and around trees easy.

With 120 litre capacity, the Estate Turf features a compact design with a 12-Volt fluid system, flojet pump, suction filter, pressure regulation and gauge with boom distribution valve.

A spray lance with 6m of hose is used for spot spraying and a 1.5 metre boom makes light work of spraying larger areas.

The 12-volt FloJet pump, model 03531-501, is protected by a suction filter and delivers 7.6 litres per minute at 3.4 BAR.

Tank lid access *left*

Under the screw cap lid is a filter basket to reduce sediment intake when filling.

Estate Turf and 6 metre hose

ESTATE Pro 120

Making light work of weed free lawn, ESTATE Pro 120 litre is a serious turf care sprayer.

Designed to be towed behind a ride on lawn mowers the ESTATE Pro comes complete with wide smooth tread flotation tyres, 120L tank capacity and a 2m foldable boom.

The long draw bar design makes for easy towing and a smooth ride for the boom.

The fluid system includes 12-volt pump, suction filter, pressure regulation and gauge with boom distribution valves. There is also a spray lance with 6m of hose for spot spraying.

The 12-volt FloJet pump, model 03531-501, is protected by a suction filter and delivers 7.6 litres per minute at 3.4 BAR.

The 2 metre foldable boom makes light work of spraying larger areas. Non drip snap fit nozzles are standard.

Swift Compact 50 & 100

SWIFT 50 and 100 litre compact sprayers meet the spraying needs of the lifestyle farmer, garden lover, estate owner, nursery professional, grounds maintenance, municipal and industrial caretaker.

For spot spraying weeds, controlling pest and disease on fruit trees or ornamental plants and applying liquid fertilizers. Also they can be used for industrial applications, such as cleaners and disinfectants.

SWIFT sprayers use a reliable flojet diaphragm pump for long service life and are available with 6 metres of hose and hand lance or 60S spray gun. They are ideally suited to spraying large areas or for spot spraying.

ATV Bike Sprayers

HARDI ATV Bike sprayers are made to fit most quad bikes, allowing the bike to become an effective and versatile sprayer with 75 litre on the back and 50L on the front. The bike sprayers are designed to provide a low centre of gravity and the tank shape has smooth contours for easy cleaning.

Bike sprayers include 6 metre hose with 700mm lance with adjustable nozzle for fine to coarse spray or optional 60S spray gun for more heavy duty applications.

ATV bike sprayers are ideally suited for large and dispersed areas, for spot spraying and for spraying hard to reach areas. Three or four metre ATV booms provide a high work rate where small fields need to be sprayed with ease.

HARDI BIKE Sprayers features a lance or 60S spray gun with adjustable nozzle, 6 metre hose, internal suction filter on the lance Flojet diaphragm pump with fuse, Ratchet tie-down straps as standard.

Options include; pressure regulation with gauge and 3-way distribution valve.

Part No	Pump	Pressure	Open flow	Operation	Lance / gun

P1.5

P1.5 Pressure Sprayer is ideal for the application of weed and pest control products, cleaning and disinfectant solutions used around the home and garden.

They are built from high quality materials for long life and performance, with readily available parts for easy servicing.

Adjustable nozzle gives control over a fine or coarse spray atomisation. Fine atomisation can be used to provide excellent surface area coverage with the least amount of fluid consumed. A coarse spray adjustment is ideal for the application of biodegradable cleaning solutions.

Pumped up to maximum pressure, you can spray for a considerable time without re-pressurising.

P6 & P8

P6 & P8 six and eight litre pressure sprayers are built tough for professional operators. They use a plunger pump to pressurise the container and a trigger valve to control intermittent or continuous spraying.

Applications for these sprayers is limited only by the imagination and with the many optional attachments available, the potential is endless.

They are built from quality components to provide long life and reliability. These have an inbuilt measuring jug in the lid and spring loaded pressure relief to prevent over pressurisation.

Part No	Sprayer	Volume
Pressure Sprayers		
84640300*	P1.5	1.5 litres
84640100*	P6	6 litres
84640200	P8	8 litres

BP15

BP15 is ideal for the home gardener, hobby farmer, small business and pest control operator. They can be used to apply weed and pest control products in areas with difficult access, for inter-row or large areas such as lawn.

It sits comfortably on the back, with an adjustable shoulder straps and waist belt.

A lever operated piston pump with pressure chamber, requires low pumping frequency and is capable of high operating pressure.

Part No	Sprayer	Volume
Backpack Sprayers		
846258*	BP15	15 litres

BPM 100

The BPM 100 is a 16 litre back pack mistblower used for low volume application of pesticides over large areas where there might be limited access or where canopy penetration is required.

A motorised centrifugal fan produces high air speed through a venturi air outlet which shears the spray liquid into a fine mist. The mist is carried to the target in the air stream which is directed by the operator.

The spraying range for the BPM100 Mistblower is 15m horizontally or 12m vertically.

A needle valve provides flow rate control and multi-function controls handle stop start, fan speed and fluid flow rate.
